

ADD RAM ELITE™

MULTI-TASKING / MULTI-USER IBM-PC or IBM PC-XT

RAMDISK™
SOFTWARE!
RAMSPOOL™
SOFTWARE!
TASCMaster™
SOFTWARE!

All these are included and more...

ADD RAM ELITE™ is a multifunction board which provides an **asynchronous** communication adapter, real time clock/calendar, parallel printer adapter, plus up to 512K memory with parity "no piggyback" and—all on one board.

64K to 512K Memory, which supports full IBM Personal Computer parity operations, adds great versatility while saving system expansion slots. Board is socketed for easy memory expansion up to 512K by purchase of additional memory chips. All 512K space is on one board, "no piggyback."

Fits perfectly into IBM PC-XT too!

Designed to Meet User Requirements, this board, for example, would allow a modem and parallel printer to be hooked up simultaneously, while enjoying the convenience of the real time clock/calendar and up to 512K (½ Megabyte) memory with all the powerful MULTI-TASKING and MULTI-USER software support.

Installed Simply and Quickly by plugging directly into any one of the expansion slots provided on the IBM Personal Computer to which it is hardware and software compatible.

With Software Support

INCLUDES		
OPTIONAL		
TASCMaster SOFTWARE operating under PC-DOS, allows up to 9 tasks (programs) to be run concurrently in background mode unattended. This integrated software package (combined with RAMDISK and RAMSPOOL) allows the user to move freely from task to task just by simple key strokes without the necessity of terminating any one of them. Also each task can run its own Autoexecute file. TASCMaster greatly increases your productivity . Use TASCMaster and it's like having several Personal Computers at your fingertips.		X
MULTI-TASCMaster SOFTWARE which allows the addition of multi-user capability to the IBM PC by connecting additional terminals to serial ports.	X	
RAMDISK SOFTWARE which offers up to 50 times faster speed in operation. Permits utilization of 1 or 2 RAMDISKS, each with up to 320K capacity integrated with TASCMaster Software to greatly enhance overall capability.		X
RAMSPOOL SOFTWARE which allows the use of the computer while printing information via printer buffer. This applies to either parallel or serial printers. And ... more than one spooler can work concurrently. Also integrated with TASCMaster Software.		X
SOFTWARE permitting the real time clock/calendar to automatically set date and time of day in the IBM PC.		X
